

Bring Home Memories—Not Diseases

Immunizations Can Protect You From Many Diseases Common in Other Countries

Preparation for foreign travel should include a visit to your healthcare provider to talk about health safety at your travel destination for you and your family.

Ask about:

- Setting up an appointment for immunization 4-6 weeks in advance of departure.
- Routine vaccinations recommended or required for entry into specific countries.
- Personal health issues, which may increase your risks for disease or complications.
- A personal immunization record card of immunization dates.

Immunizing before your trip will help prevent introduction of vaccine-preventable diseases into your community upon return home.
