Community Health Improvement Plan

Alachua County, Florida

Introduction

Alachua County has been working towards its vision “A community where everyone can be healthy” since November 2012. In December 2019, the Community Health Improvement Plan (CHIP) Steering committee agreed to move forward with a new Community Health Assessment (CHA) to guide a new CHIP for Alachua County. The Florida Department of Health in Alachua County partnered with UF Health Shands and engaged the services of WellFlorida Council to complete the CHA. The CHA was published in June of 2020. This document is available on the FDOH-Alachua website - [Alachua.FloridaHealth.gov](https://www.floridahealth.gov/Alachua)

The Vision

The Community Health Improvement Plan (CHIP) Steering Committee’s vision for Alachua County is **A Community Where Everyone Can Be Healthy**

The Process

Alachua County again selected the Mobilizing for Action through Planning and Partnerships (MAPP) process for community planning. MAPP is a nationally recognized model and best practice for completing needs assessments and improvement plans. The MAPP tool was developed by the National Association of County and City Health Officials (NACCHO) in cooperation with the Public Health Practice Program Office at the Centers for Disease Control and Prevention (CDC). NACCHO and the CDC’s vision for implementing MAPP is “Communities achieving improved health and quality of life by mobilizing partnerships and taking strategic action.” MAPP employs four assessments, which offer critical insight into challenges and opportunities throughout the community.

- **The Community Strengths and Themes Assessment** provides an understanding of the issues residents feel are important by answering the questions “*What is important to our community?*”, “*How is quality of life perceived in our community?*” and “*What assets do we have that can be used to improve community health?*”
- **The Local Public Health System Performance Assessment** is a comprehensive assessment of the organizations and entities that contribute to the public’s health. The Local Public Health System Performance Assessment addresses the questions “*What are the activities, competencies, and capacities of our local health system?*” and “*How are Essential Services being provided to our community?*”

- **The Community Health Status Assessment** identifies priority issues related to community health and quality of life. Questions answered during this phase include *“How healthy are our residents?”* and *“What does the health status of our community look like?”*
- **The Forces of Change Assessment focuses** on the identification of forces such as legislation, technology and other issues that affect the context in which the community and its public health system operates. This answers the questions *“What is occurring or might occur that affects the health of our community or the local health system?”* and *“What specific threats or opportunities are generated by these occurrences?”*

All four assessments were completed by mid-February, prior to the COVID-19 pandemic response and interruption to operations in the community. As a result, the CHIP Steering Committee convened exclusively through virtual platforms for the remainder of the process. Key finding and strategic prioritization meetings were also held virtually between April and May 2020. Each of the four assessments that were conducted are described in a written report and summarized in the 2020 Community Health Assessment (CHA) and the Technical Appendix.

Each assessment was conducted and described in a written report and the findings of all the assessments were summarized in the Community Health Assessment and the Technical Appendix. The CHA has been designed to work in concert with the Technical Appendix.

While the CHA presents data and issues at a higher, more global level for the community, all the data in the CHA that have identified these global health issues for the community are addressed in granular level detail in the Technical Appendix.

Between July and October of 2020 meetings were held with existing groups in the community to address the six priority areas that were identified from the CHA. Goals, strategies, and objectives were developed with subject matter specialist to create the CHIP Action Plan. Each group discussed available resources and how these resources may be used to achieve the goals and objectives in the CHIP. These discussions resulted in the development of action plans for each strategic issue area and are compiled in the **CHIP 2021-2024 Work Plan. (p. 9 – 22)**

Strategic Issues

The intersecting themes that arose from the CHA included:

- Access to mental health care
- Health disparities (burden of disease higher among specific races, ethnicities, and residents living at various poverty rates)
- Access to affordable housing and utilities
- Access to employment
- Homelessness
- Income disparities
- Low utilization of preventive healthcare services
- Access to healthcare (physical healthcare)
- Lack of funding for safety-net providers
- Access to health insurance
- Access to dental care
- Public engagement and representation in policy change
- Adequacy of linkage to care services
- Access to nutritious food (proximity and affordability)
- Walkability and Pedestrian Safety
- High rate of STDs
- Opioid epidemic and substance misuse
- Tobacco use and changes in nicotine delivery products (such as electronic cigarettes)
- Zoonotic diseases
- Inappropriate use of healthcare resources
- Superfund site

Strategic Priorities Identified

Following the final assessment, a list of potential strategic priority issues was presented to the Steering Committee based on intersecting themes from the assessments. From the strategic issues identified, a survey was administered to further prioritize health issues. Six strategic priority areas were identified under the broad areas of access to health care and community wellness.

Access to Health Care

- 1. Preventative and Primary Care Access*
- 2. Dental Care Access*
- 3. Mental Health Access*

Community Wellness

- 4. Nutrition and access to nutritious foods*
- 5. Prevention and management of chronic disease*
- 6. Affordable Housing*

Health disparity and health inequity topics will be interwoven into the goals of each of these priority areas.

Health disparities, as defined by the Centers for Disease Control (CDC), are differences in health outcomes and their determinants between segments of the population, as defined by social, demographic, environmental, and geographic attributes.

Health Equity, as defined by the Centers for Disease Control (CDC), is the attainment of the highest level of health for all people. Achieving health equity requires valuing everyone equally with focuses and ongoing societal efforts to address avoidable inequalities, historical and contemporary injustices, and the elimination of health and health care disparities.

Engaging the Community

Alachua County has been very fortunate to have an active, informed, and passionate community who are always willing to come together to address issues in the community, including health. A diverse group of individuals representing county and municipal governments, the school board, hospitals, the homeless population, behavioral healthcare, academia (including dental and health disparities), tobacco policy and prevention, family medicine, rural health, food systems, federal nutrition programs, public health, public housing, and social services all participate in the CHIP steering committee. Many of these same partners have agreed to participate in the implementation plan by conducting the activities described in the work plan. GNV4ALL is a group working in the community to improve the lives of Alachua County residents. The major focus areas include education, housing and transportation, criminal justice and jobs and families. Making improvements in any of these areas will help to address some of the social determinants of health. More information about GNV4ALL is available at <http://gnv4all.org/>

About the Plan

The Alachua County Community Health Improvement Plan is a 4-year plan beginning in January 2021 and ending in December of 2024. The CHIP objectives use quantifiable performance measures, many of which are based on data included in the community health assessment. The CHIP includes a description of priority health issues, evidence-based strategies, measurable objectives with baseline, target value and target date. Social determinants of health and health inequities were considered in the prioritization process in determining the strategic priority areas. The goals, objectives and evidence base strategies, are in alignment with the State Health Improvement Plan (SHIP) [Florida SHIP](#) and [Healthy People 2030](#).

Implementation of the CHIP will be conducted by all the agencies and partners listed in the work plan. Each of the six goals are adopted from established groups in the community, which allows the CHIP to function with existing resources. This was an efficient way to engage subject matter experts in the process while preventing duplication of services. Individuals and organizations have accepted responsibility for implementing the strategies in the CHIP.

Monitoring the CHIP will be done by the CHIP steering committee with support from staff and volunteers at the Florida Department of Health in Alachua County. The Safety Net Collaborative and the Healthy Communities group will also play a role in monitoring the CHIP. Updates will be provided quarterly to Healthy Communities, the Safety Net Collaborative, and the Mental Health Coalition. These groups will make recommendations to the CHIP steering committee on an annual basis so the CHIP can be revised as needed. The Alachua County Health Care Advisory Group (an advisory group to the Alachua County Board of County Commissioners) will also be informed on the progress of the CHIP. This group meets six times year. There is a health department position who reports on the status of the CHIP at each meeting. A report will be delivered to the Alachua County Board of County Commissioners on an annual basis. All revisions to the CHIP will be posted on the Florida Department of Health in Alachua County website Alachua.FloridaHealth.gov

CHIP Work Plan 2021 – 2024

Access to Care

Goal 1 Residents of Alachua County will be able to access comprehensive primary care and preventive services.

Strategy 1.1 Collaboratively assess and report Alachua County’s health care resources and needs, including patterns of health care utilization and barriers to care. Review indicators of access to care by comparing indicators to plan objectives and modifying and updating the plan if needed.

Objective 1.1.1 By December 31, 2024, annual reviews/revisions of the CHIP will increase from 0 to 4. (Annual report published each year) 3

Data Source: DOH-Alachua

Evidence Base: Community Guide

Activity	Lead Person/ Organization	Anticipated Product or Result	Resources Required	Target Date	Status or Progress
Publish CHIP Annual Report	DOH Alachua	Annual Report posted to DOH-Alachua website	Staff time	12/31/2024	CHIP 2022 Revision is in progress.
Provide annual CHIP update to Alachua County Health Care Advisory Board (ACHCAB). LEAD: Alachua County Health Department	DOH Alachua	Provide CHIP Annual update to ACHCAB	Staff time	12/31/2024	CHIP Update is provided, meetings held monthly with health department representative in attendance.
Schedule screenings - mammograms and pap screenings	We Care	Schedule at least 75 mammograms and 30 Pap tests annually	Staff time, funding	12/31/2024	We Care scheduled a total of 63 CBEs, 53 mammograms, 4 ultrasounds, 3 biopsies, and 1 MRI in 2022.

Goal 2 Improve access to primary care services.

Strategy 2.1 Increase access to third party coverage, primary care, and other resources to maintain and expand safety net services and supplies.

Objective 2.1.1 By December 31, 2024, the three-year rolling rate of preventable hospitalizations under 65 will decrease from 977.8/100,000 to 928.1/100,000 (5%). 792.5/100,000
